

Demo::createBridgeFile

```
graph LR; A[Demo::init] --> B[Demo::createBridgeFile];
```

A diagram showing a call from `Demo::init` to `Demo::createBridgeFile`. The `Demo::init` node is a white rectangle with a black border on the right. The `Demo::createBridgeFile` node is a gray rectangle with a black border on the left. A dark blue arrow points from the right side of the `Demo::init` node to the left side of the `Demo::createBridgeFile` node.

Demo::init
